ABSTRACT

A film-coated tablet with cyclophosphamide as active compound, having a core containing cyclophosphamide, one or more fillers, flow regulators, lubricants, and one or more dry binders but no preswollen starch. The core of the tablet may contain, *inter alia*, lactose monohydrate, D-mannitol or CaHPO_4 as filler; nonpreswollen cornstarch or microfine cellulose as dry binder; highly disperse silica as flow regulator; and magnesium stearate, stearic acid, glycerol palmitostearate, polyethylene glycol, talc or glycerol monobeherate as lubricant.
